

Questions and Answers

Solicitation # SBG30016Q0922 - Construction/repair works at MSGQ

Dear Prospective Offeror,

Please see answers in response to the questions received from the following contractors on the subject solicitation:

Questions from Mukta Dinwiddie Maclaren Architects:

Question # 1: Package A SL no 3 & 4 – Water Proofing Compound & Water Proofing Membrane needs more specification.

Answer: Water proofing membrane is the EPDM Membrane. Please see the referenced manufacturer's name for water proofing compound.

Question # 2: SL 10 - Sandstone placing – We didn't find any specification or location in your scope of work (page 36/37).

Answer: Location of the sandstone is near all the roof drains.

Question # 3: Package B SL no 1 & 2 – Area should be correctly mentioned.

Answer: Area should be 1200 sft instead of 200 sft (see attached Amendment # A002).

Question # 4: Package C SL no 2 – In the BOQ it is mentioned that “Fabricating and modifying the existing steel truss/structure” but during the briefing, it was described that truss/ structure should be newly constructed, so its clarification. In the case of the new structure the truss materials, the specification should be reviewed and corrected.

Answer: Truss should be newly constructed.

Question # 5: In the BOQ/SOW, there is no mention of Plexi Glass but it is mentioned in the supplied drawing. Please clarify.

Answer: Plexi glass is USG responsibility.

Questions from Mobiserve Bangladesh:

Question # 6: During visit the site on 16-Aug-2016 for the RFQ # SBG30016Q0922 the respected engineer informed us that the below items qty will be approx. 1600sft(For Eight Room) instead of 200sft (For One Room). But in the Amendment #A001 there is no information about the qty changes issue for the below items. So, please confirm that which qty we will consider for the below items for the RFQ # SBG30016Q0922.

Answer: Area should be 1200 sft instead of 200 sft (see attached Amendment # A002).
